Reasons for Allowance

Page 2

The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could not be found and was not suggested

by the prior art of record. The subject matter not found was a physiological monitoring device

having a processor adapted to determine whether a first amount of time exceeds a predetermined

amount of time, and if it does not exceed the predetermined amount of time to calculate an

amount of fluid to be infused, in combination with the features of the claims. The examiner is

interpreting the phrase "processor is adapted to" to mean that the processor is actually

programmed to perform that function, not that it is inherently capable of being programmed to

perform that function. To meet this claim limitation the prior art must explicitly disclose a

processor that is actually programmed to perform this function. This feature could not be found

in the prior art.

The closest prior art of record is Lebel et al (US 2002/0019606). Lebel discloses a

microprocessor controlled infusion apparatus having a communicator device. This device

includes electronic control circuitry, an infusion device, and a processor, but fails to disclose that

the processor is adapted to perform the functions of applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Laura A. Bouchelle whose telephone number is 571-272-2125.

The examiner can normally be reached on Monday-Friday 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nicholas Lucchesi can be reached on 517-272-4977. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
